

**Missouri State Library
STEM Kits Grant
Awarded April 2022**

The STEM Kits Grant is a short duration grant for public libraries to purchase premade STEM or STEAM kits for their libraries. Most libraries will check out the kits to their patrons and others will use them for programs. Each kit generally comes with an activity, book(s), and items to support a theme. All of these are packaged in an appropriately sized bag to store and carry the components.

The grants were accepted on a rolling basis until the allocated funding was depleted on April 21, 2022. Forty-five STEM grant applications were received, requesting a total of \$313,177.38. Forty-four grants were awarded a total of \$297,974.67.
